TRUSTEES' REPORT.

*To His Excellency the Governor, and the Honorable Council of
the Commonwealth of Massachusetts.*

The Trustees of the Worcester Lunatic Hospital submit this, their Fortieth Annual Report, for the year ending September 30, 1872.

The reports furnished by the Superintendent and Treasurer present full statements in regard to the patients and finances of the hospital. It is only necessary for us to refer to them without repeating them.

It appears from the table furnished by the Superintendent, that the whole number of patients in the hospital at the end of the year was four hundred and thirty-nine, the largest number at the end of any year except the four years immediately preceding the opening of the Taunton Hospital. This increase in the number of patients is the more worthy of notice, because it has arisen in spite of the relief afforded our crowded hospital, by the great reduction of the number of state paupers through the intervention of the Board of State Charities, which has, from time to time, transferred the greater part of them elsewhere.

Even since the establishment of the Taunton and Northampton hospitals, up to the year 1864, the number of this class of patients always exceeded one hundred, and in some years very largely. It is now reduced to twenty-five. The number of this class at the close of the last five years was as follows:—

1868,	.	.	.	.	.	.	95
1869,	.	.	.	.	.	.	51
1870,	.	.	.	.	.	.	35
1871,	.	.	.	.	.	.	29
1872,	.	.	.	.	.	.	25

An important conclusion which is forced on us from these facts is, that the new hospital which the legislature has authorized the Trustees to build to accommodate four hundred lunatic patients, will, in a very short time, be insufficient for the public necessities. Unless power is given to build a larger hospital, the Trustees will be obliged to construct it in such a manner as to admit of additions being made to it which will not mar its architectural effect, or diminish its convenient use. This, however, can be readily done.

The barns and stables mentioned in the last report of the Trustees, have been completed on the new hospital grounds, and for about the cost originally calculated. The plans and estimates for the new hospital, and for preparing the ground for its erection, are in such a state of forwardness, that we trust very shortly to be able to submit them to your Honors, as required by the Resolve of the last session.

The Trustees have had great confidence that the sale of the lands of the present hospital would pay much the larger part of the cost of erecting the new hospital, and have even supposed that all the expenses of the work might, perhaps, be paid from this source.

The sales, however, which must be gradual, could not cover much of the most valuable part of the property, until the new buildings are erected, and the patients removed to them from the old hospital.

Consequently the Trustees must be largely assisted by the State in erecting the new hospital, while the work is in progress. They are happy to say that the sales of lands made up to this

time, have exceeded the estimates of their value. They are as follows:—

Land sold the Commonwealth for a Normal School,	\$25,000 00
Land sold City of Worcester, for a school,	23,250
feet, at \$1 a foot, ...	23,250 00
Land sold C. H. Fitch, 6,769 feet, at 90 cts. a foot,	6,092 10
Total, ...	\$54,342 10

The deeds of these last two sales have not yet been delivered, but as the Trustees know of nothing likely to interfere with the consummation of the bargains, they are recorded here.

The Trustees have, so far, seen no reason to doubt the benefit, to a limited extent, of the cottage system, as it is called, which they commenced by placing in houses already on the new lands, families composed of patients under proper supervision, who do not require all the restraint of a hospital.

The content and cheerfulness exhibited by most of the patients when thus restored to something like a home life, can hardly fail to promote their recovery, or when that is hopeless, to improve their condition.

The experiment so far has been carried on under great difficulties, arising partly from the distance of the cottages from the present hospital, partly from the buildings not having been originally designed for the purpose for which they are now used, and partly from the commencement of a new system. It is too early now to compare the expense of supporting patients at the hospitals and in the cottages, or to say for how large a proportion of them the cottage system can be used to advantage. It may be that it is not advisable to extend it further than we have already done.

During the last year Dr. Merrick Bemis resigned his situation as Superintendent of the hospital, after a long service of twenty-four years, first as Assistant-Physician, and afterwards as Superintendent.

The Trustees elected Dr. Bernard D. Eastman, First Assistant-Physician of the National Hospital at Washington, to succeed Dr. Bemis as Superintendent, and he entered on the office on the twenty-fifth day of July last. From the high character which

Dr. Eastman had gained before his connection with us, as well as from the remarkable capacity which he has shown for the arduous duties of his situation during the short time he has held it, we confidently anticipate that his administration of the hospital will prove highly creditable to himself, and useful to the public.

The Trustees have recently chosen Dr. John G. Park, of Worcester, Assistant-Superintendent. We have every reason to believe that he will prove an efficient and valuable officer.

The Trustees consider the hospital fortunate in still retaining the services of Dr. Stinson, as Assistant-Physician for the female wards, the first of her sex, they believe, who has held such a position.

The report of the Treasurer presents a very prosperous condition of the finances of the institution. Yet the Trustees are forced to repeat what has been stated in more than one of their previous reports, that the price for the board of paupers paid by the State and towns, does not defray the actual expense of maintaining them; and that the deficiency has to be made up out of the price paid by private patients.

The payment of this enhanced price is frequently a great hardship. Patients are often supported by relatives who are properly reluctant to have them appear as town paupers, and yet who have to work hard to pay five dollars a week for them. We venture to suggest to the benevolent, who give so generously to public charities, that the creation of a fund to pay a part of the board of this class of patients from its income, would be money well bestowed. The hospital has now a small fund, given by a lady's will, that now amounts to nearly three thousand dollars, the income of which, the Trustees think of appropriating for the benefit of those private patients who most need assistance.

Many suppose that it is quite needless to give money to the hospitals of the Commonwealth, which is so able to support its own charities. But it should be recollected that the board of this class of patients is not paid by the State, but by relations, frequently impoverished by the insanity of the fathers, sons, daughters and brothers whom they are compelled to support when least able to do so. To assist these persons is in no sense giving money to the Commonwealth, but it is relieving per-

sons in straitened circumstances, who are specially deserving relief.

The Trustees commence the new official year under very favorable auspices, with officers in whom they have full confidence, with finances unembarrassed, and the location of the new hospital which they propose to build, most fortunate.

WORCESTER, October 24, 1872.

SUPERINTENDENT'S REPORT.

To the Board of Trustees.

GENTLEMEN:—I have the honor to submit the Fortieth Annual Report of the Worcester Lunatic Hospital.

Inasmuch as I have been conversant with the operations of the hospital but little more than two months, this Report will, for the most part, be a compilation from the records of the hospital as they came into my hands.

TABLE NO. 1.

Showing the general results during the year.

	Males.	Females.	Total.
Patients in the Hospital, Oct. 1, 1871, . . .	200	221	421
Admitted during the year, ...	251	192	443
Whole number under treatment, . . .	454	413	864
Discharged recovered, ...	91	54	145
Improved, ...	102	90	192
not improved, ...	32	16	48
Died, ...	29	11	40
Whole number discharged, ...	254	171	425
Remaining September 30, 1872, . . .	197	242	439

It appears that the number of admissions for the year ending September 30, 1872, was twenty-seven (27) less, and the number discharged, including deaths, was thirty-two (32) less than during the previous year.

TABLE No. 3.

Showing the Causes of Insanity, as well as could be ascertained, in the number of cases admitted during the year 1872.

CAUSES.	NUMBER OF CASES.		NUMBER PREDISPOSED.	
	Males.	Females.	Males.	Females.

The plans for the new hospital buildings are being perfected as rapidly as possible, and many of the details have already met your approbation. It is thought these plans will strike a happy medium between the older fashioned system of aggregation and the theoretical system of segregation, which has been urged in some quarters.

If, while patients are aggregated in a way which affords the best opportunity for careful personal observation, and reduces the expense of administration, sustenance and entertainment to the lowest limit compatible with the demands of the most enlightened treatment of the unfortunate insane, they are separated into small classes, the best features of both systems will be combined.

This is what it is hoped will be accomplished by following the general arrangement of the best modern hospitals, upon the connected plan; but breaking up the long, tiresome corridors with pleasant sitting-rooms and recesses connected with passage-ways from which open the bed-rooms.

This will also render it practicable to sub-divide the individual wards, should it be desired, and to furnish at any time private apartments for special patients and particular occasions, the advantages of which every Superintendent will appreciate.

The separation of the adjacent sections of the building by glazed verandas will afford opportunity for the enjoyment of light and air and indoor plants, and will also be a great protection against the spread of fire, should the hospital ever be so unfortunate as to have that calamity befall it.

I am under obligation to Dr. Stinson and Mr. D. W. Bemis, the only two of the corps of officers whose connection with the hospital antedates my own, for the valuable assistance they rendered in the really great work of becoming acquainted with the routine of such a large institution. In Dr. Park and Miss Taylor I also find efficient and valuable officers.

To you, gentlemen, I must return my sincere thanks for your cordial coöperation and ready assistance in the difficult and arduous duties devolving upon me.

B. D. EASTMAN,
Superintendent.

TREASURER'S REPORT.

To the Trustees of the Worcester Lunatic Hospital.

GENTLEMEN:—I herewith submit my Annual Report on the finances of the Worcester Lunatic Hospital for the year ending September 30, 1872.

RECEIPTS.

Cash on hand September 20, 1871, ...	\$8,185 23
received of the Commonwealth for support of patients, ...	9,099 00
received of cities and towns for support of patients, ...	39,233 75
received of individuals for support of patients,	48,148 45
received for interest and sale of produce, etc.,	3,125 79
received of the Commonwealth on New Hospital account, ...	727 00
	\$108,519 22

The expenditures for the year have been as follows:—

Provisions:

Flour, 612 barrels, ...	\$5,551 29
Fresh meats, ...	4,172 33
Salt meats, ...	3,308 42
Meal for cooking, ...	400 07
Beans, potatoes and other vegetables,	1,261 91
Fish, ...	898 86
Sugar, ...	2,556 44
Molasses and sirup, ...	464 00
Tea, ...	1,193 51
<i>Amount carried forward,</i>	\$19,806 83

<i>Amount brought forward,</i>	.	.	.	\$19,806 83
Coffee and chocolate,	.	.	.	1,044 57
Rice and crackers,	.	.	.	543 34
Butter,	.	.	.	5,091 90
Vinegar and pickles,	.	.	.	205 30
Cheese,	.	.	.	74 56
Fresh fruits,	.	.	.	281 13
Eggs, salt and other groceries,	.	.	.	2,517 17
Total for provisions,	.	.	.	<u>\$29,564 80</u>
Salaries and wages,	.	.	.	31,846 02
Extra labor,	.	.	.	696 00
Provender and bedding for stock,	.	.	.	1,058 57
Furniture, crockery, bedding, &c.,	.	.	.	6,445 62
Light,	.	.	.	2,225 30
Soap,	.	.	.	483 90
